Keep your crypto safe

Insured and protected

Insurance held by us and our custodial partners helps protect your crypto against crime like hacks or theft. Our partners have over \$200M in cold storage coverage each.

Held by us, owned by you

Your crypto is held in trust and stored between us and our custodial partners. In the unlikely event of insolvency, your crypto is still yours.

Compliant from the start

We built our platform with regulatory guidance from the get-go. We work with regulators to make sure our app is reducing risk for crypto where possible.

All-in-one pricing

Simple transaction fees

We charge a 1.5%–2% operational fee per transaction.

What's included?

Transaction fees include the cost of our liquidity providers, operational fees, and safe coin storage.

No surprises

We don't charge commission on trades, or any fees to deposit or withdraw your coins.

How are the coins stored, what's the security/insurance?

The majority of your coins are held in offline cold storage with our custodial partners. All of our custodial partners are regulated entities themselves — and they have over \$200M in insurance coverage **each**.

The remainder of your coins are stored with us in hot wallets. Those have coverage too! We've partnered with Coincover to make sure that in the very, very unlikely event that there's a hack, you'll have additional ways to recover your assets.

What types of accounts can I open with Wealthsimple Crypto?

Cryptocurrencies can only be held in a non-registered account with Wealthsimple Crypto.

Is Wealthsimple Crypto regulated?

Wealthsimple Crypto is made available through the Wealthsimple Trade app. Wealthsimple Digital Assets Inc. (WDA) offers Wealthsimple Crypto to Canadians under time-limited registration as a restricted dealer through the Canadian Securities Administrators' Regulatory Sandbox. Crypto-assets purchased and held in an account with Wealthsimple Crypto are not protected by the Canadian Investor Protection Fund, the Canadian Deposit Insurance Corporation or any other investor protection insurance scheme. You can find more information about Wealthsimple Digital Assets in our Client Relationship Disclosure.

What is staking and how does it work?

Put simply: staking is a way to earn passive rewards (in the form of more crypto) for holding certain cryptocurrencies. Staking lets you earn rewards on your crypto by contributing to the Proof of Stake (POS) network of a particular cryptocurrency. When you stake your crypto, you help the underlying blockchain of that asset become more secure and efficient. In exchange, you get rewarded with more assets from the network.

Currently you can stake the following with their corresponding Annual percentage yield (APY):

- • Ethereum (ETH) - 4.15%
- • Solana (SOL) - 4.6%
- • Cardano (ADA) - 2.63%

Your staking yields may vary based on a number of factors listed [here](#). To learn more about Staking and how to stake your coins, check out our help center article [here](#).

I'm new to crypto, what kind of support can I get?

Our app is designed to be simple — but if you run into any questions with your account, you can always contact our support team by chat, email, or phone and they'll be happy to help. And yes, you'll **always** be put in touch with a real human.

For questions about crypto trading in general, our [Crypto Help Centre](#) and news in the app should keep you in-the-loop with everything you need to get started.
